## PERFORMANCE

Featuring wall-hugging adjustable bed technology, the BetterRest design keeps you in the same relative position to your bed/night stand, even when the bed is raised to its upright sitting position. With wireless remote control, this ingenious bed design is easy to use.

The head and foot massage motors are thoughtfully designed in soundproof enclosures to ensure quieter operation. Advanced motor technology offers variable massage speeds to provide the safe, gentle and relaxing experience that your customers want.

Designed with more memory functions than other adjustable beds, the superior control circuits can synchronize the head and foot sections to raise/lower simultaneously with the push of one button. Choose the amazing zero-gravity position that relaxes the spine and body through neutral positioning and a feeling of weightlessness, or select any bed position that suits your customers' needs best. BetterRest, a superior adjustable bed experience.

## SAFETY

Because safety is important, Jobri also has incorporated features not always found in competitive products. Look for the robust double rail system with increased wall thickness to prevent warping, and larger fasteners for greater strength.

The emergency lowering function allows you to lower the bed to its original position in the event of a power failure.

## DESIGN

Engineered in Germany and robotically powder coated for outstanding styling and durability, the BetterRest adjustable bed is manufactured to the highest European quality standards.

The carefully crafted beveled foam skirt won't drag on the wall or headboard when the bed is in motion, and the sleek lines of the bed stay true because there is no unsightly bulging foam. The side walls are cut at the bend points to expand and contract with the bed movement.

## GERMAN ENGINEERING EXCELLENCE

Designed, tested and manufactured to the highest quality levels by a worldwide leader in adjustable bed technology, the BetterRest adjustable bed features the unique wall-hugging concept that mirrors the look of a traditional sleep set.

With superior functionality and German precision engineering, the BetterRest bed offers unsurpassed sleeping comfort, ease of use and the best warranty on the market.

The electric adjustable bed features a wireless remote control, head and foot massage, a super quiet German motor and easy installation with all standard foot and headboards. With more than 10 years US proven performance, the BetterRest adjustable bed is supported by more than 15,000 service technicians nationwide.

## A SIZE TO SUIT ANY CUSTOMER

With so many choices, you can be sure you have just what your customer is looking for...all at a great value. When you promote the BetterRest adjustable bed, you'll be able to provide just the right bed for every need. Look for these size options and their respective weight limits:

Twin, Twin XL, Full, Full XL, & Queen – 450 lbs (200 kgs)

Split Queen, Split King & Split King CA – 450 lbs (200 kgs) each side
